Founder & Product Experience

Co-Founder & CTO March 2026 – Present

Shipped.one | Electron, React, TypeScript, PostgreSQL, Redis

- Built a desktop product spanning **job discovery, tailored resumes, portfolio generation, and application submission**, using Electron, React, and TypeScript with browser automation across applicant tracking systems.
- Designed posting validation and application review workflows so users can evaluate role fit and approve submissions; supported **50 concurrent users** with tracking, billing, and live progress updates.

Co-Founder & CEO July 2026 – Present

Heron | Campaign pricing, prediction markets, customer discovery

- Co-founded a platform that lets merchants offer **customer refunds when a specified public event occurs**, using prediction-market prices to quote campaigns and hedge potential payouts.
- Developed the **campaign pricing calculator**, translating attendance, refund limits, and merchant costs into quotes, projected profit, and comparisons with standard discounts.
- Led customer discovery: contacted **300 sports bar owners**, held **20 meetings**, secured a verbal pilot commitment, and qualified **949 prospects across 23 states**.

Founder June 2025 – Aug. 2025

Aionix.dev

- Built automation systems for U.S. companies, connecting **n8n workflows**, chatbots, voice agents, APIs, and CRMs to streamline lead intake, outreach, and follow-up.

Engineering Experience

Software Engineer Intern Sept. 2026 – Present

Pulse Imaging | Python, FastAPI, React, TypeScript, Electron, Cornerstone3D

- Reduced calcium-statistics computation time by **93%** (**2,994 ms to 199 ms**) on a 512×512×300 CT volume by consolidating repeated scans and sharing connected-component analysis.
- Improved application correctness and reliability through **lesion-level Agatston scoring**, API authentication, request limits, and fixes to packaged desktop startup and shutdown.

Database Developer Intern Sept. 2022 – Dec. 2022

Guru Amardass Private Limited

- Reduced data processing time by **40%** with Python migration scripts and SQL query optimization; built data pipelines and ERP reporting dashboards.

Open Source

Contributor | *C, Python, TypeScript, Java* July 2026 – Present

- Contributed **13 merged fixes across nine open-source projects**, including libgit2, NLTK, TanStack Table, Poetry, and JavaParser; reproduced failures in unfamiliar codebases and added regression tests.

Selected Projects & Awards

SeeCare | **Best Senior Project, Winter 2025** | *FastAPI, MongoDB, AWS, DeepFace* Sept. – Dec. 2025

- Built a mobile memory aid for dementia support, combining **facial recognition**, wake-word conversation capture, speaker diarization, and generated summaries for person and conversation recall.

Three-Time Hackathon Winner | *OSU Lovable Hackathon, CaseHacks* 2025

- Won OSU Lovable with **BitLens**, a repository documentation tool, and CaseHacks with ***PosePal***, an AI photo-discovery app.

Education

Case Western Reserve University Cleveland, OH

Bachelor of Science in Computer Science, Minor in FinTech *May 2026*

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, C/C++, Java, Bash
Product Engineering: React, Next.js, Electron, FastAPI, PostgreSQL, Redis, Supabase, API Integrations, Browser Automation
AI & Delivery: LLM Orchestration, LangChain/LangGraph, RAG, WebSockets, Docker, AWS, Azure, GitHub Actions, Linux, n8n
