Education

Case Western Reserve University — Cleveland, OH

Bachelor of Science in Computer Science, Minor in FinTech — *May 2026*

- **Relevant Coursework:** Algorithms, Operating Systems, Database Systems, Computer Architecture, Machine Learning, Artificial Intelligence, High Performance Computing

Engineering Experience

Software Engineer Intern — Sept. 2026 – Present

Pulse Imaging | Python, FastAPI, React, TypeScript, Electron, Cornerstone3D

- Reduced calcium-statistics computation time by **93%** (**2,994 ms to 199 ms**) on a 512×512×300 CT volume by consolidating repeated scans and sharing 3D connected-component analysis.
- Corrected **Agatston scoring** to weight individual lesions by peak density, resolving overestimation caused by a shared artery-level weight; added tests for scoring correctness.
- Implemented **API authentication**, rate limiting, upload limits, and controlled file imports; fixed backend startup and shutdown defects identified through packaged-application CI.

Co-Founder & CTO — March 2026 – Present

Shipped.one | Electron, React, TypeScript, PostgreSQL, Redis

- Built an **Electron desktop application** that matches users to jobs, tailors resumes, generates portfolio projects, and submits applications across applicant tracking systems using **browser automation**.
- Designed posting validation and application review workflows; supported **50 concurrent users** with application tracking, email monitoring, billing controls, and live progress updates.

Founder — June 2025 – Aug. 2025

Aionix.dev

- Built **n8n workflows**, chatbots, and voice agents, integrating webhooks, APIs, CRMs, email, and LinkedIn to automate lead intake, outreach, and follow-up for U.S. companies.

Database Developer Intern — Sept. 2022 – Dec. 2022

Guru Amardass Private Limited

- Reduced data processing time by **40%** with **Python** migration scripts and **SQL** query optimization; built data pipelines and ERP reporting dashboards.

Open Source

Contributor | *C, Python, TypeScript, Java* — July 2026 – Present

- Contributed **13 merged pull requests across nine projects**, including libgit2, NLTK, TanStack Table, Poetry, and JavaParser, with fixes reviewed and accepted by maintainers.
- Fixed Git index conflicts and empty-file diff parsing, Unicode tokenization, dependency-version selection, and locale-dependent parsing; added targeted **regression tests**.

Selected Projects & Awards

Heron | *Co-Founder & CEO, Campaign Pricing* — July 2026 – Present

- Developed a **pricing calculator for event-triggered refund promotions**, converting attendance, refund limits, and merchant costs into campaign quotes, projected profit, and comparisons with standard discounts.

SeeCare | **Best Senior Project, Winter 2025** | *FastAPI, MongoDB, AWS, DeepFace* — Sept. – Dec. 2025

- Built a mobile memory aid for dementia support, combining **facial recognition**, wake-word conversation capture, speaker diarization, and generated summaries for person and conversation recall.

HiveMind | *Next.js, FastAPI, LangChain/LangGraph, OpenRouter, WebSockets* — Jan. 2026

- Built a **multi-agent prediction-market simulation** where agents research real-world signals and trade in automated markets, with live activity and consensus forecasts over WebSockets.

Three-Time Hackathon Winner | *OSU Lovable Hackathon, CaseHacks* — 2025

- Won OSU Lovable with **BitLens**, a repository documentation tool, and CaseHacks with ***PosePal***, an AI photo-discovery app.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, C/C++, SQL, Bash
Backend & Data: FastAPI, Flask, SQLAlchemy, PostgreSQL, Redis, MongoDB, Supabase, REST APIs, WebSockets
Applications & Tools: React, Next.js, Electron, Docker, AWS, Azure, Linux, GitHub Actions, NumPy, PyTorch, LangChain/LangGraph
