Education

Case Western Reserve University Cleveland, OH

Bachelor of Science in Computer Science, Minor in FinTech *Expected May 2026*

- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Computational Perception, Data Science Systems, Algorithms, Data Structures, Theoretical Computer Science, Operating Systems, Database Systems, Computer Architecture, High Performance Data & Computing, Software Engineering, Linear Algebra, Probability & Statistics, Differential Equations

Experience

Founder June 2025 – August 2025

Aionix.dev

- Built **AI automation systems** for U.S. based companies using **n8n workflows**, custom chatbots, voice AI agents, and CRM integrations to streamline engagement and lead generation.
- Designed multi-step workflows connecting **webhooks**, APIs, CRMs, email, Instagram, and LinkedIn to automate outreach, intake, follow-ups, and **engagement tracking**.

Database Developer Intern Sept. 2022 – Dec. 2022

Guru Amardass Private Limited

- Developed **Python scripts** for **data migration** and **SQL query optimization**, reducing processing time by **40%**.
- Built **data pipelines** to process large datasets efficiently and optimize resource allocation for improved performance.
- Worked with cross-functional teams to debug ERP-related issues, deploy scalable solutions, and improve workflow efficiency.
- Designed **SQL dashboards** and visualization tools to help stakeholders interpret business insights effectively.

Leadership

Founder & Product Lead March 2026 – Present

Shipped.one | Electron, React, TypeScript, Prisma/PostgreSQL, Supabase, Redis, WebSockets

- Built an **AI-powered desktop platform** that helps users discover matched roles, tailor resumes, generate portfolio projects, and apply across multiple **ATS systems** through live **browser automation**.
- Designed a review-first application pipeline that validates live postings, scores skill fit, previews tailored resumes, and lets users approve, retry, or auto-submit applications through a local browser agent.
- Scaled the product to **50 concurrent users** with application tracking, inbox and email signal detection, GitHub portfolio generation, billing controls, and **real-time progress updates**.

Projects

BrainWave | *React, Supabase, WebRTC, OpenRouter AI API, Flask, Authlib, Flask-SQLAlchemy* Jan 2025 – May 2025

- Built **real-time peer-to-peer learning platform** with integrated chat, file sharing, voice/video conferencing (**WebRTC**), shared calendar scheduling, virtual whiteboard, and interactive quizzes for collaborative study sessions.
- Migrated backend from Flask/SQL to **Supabase-managed infrastructure** (**PostgreSQL**, Row Level Security, real-time subscriptions, file storage) with **OAuth 2.0** authentication for scalable group management.
- Integrated **AI assistant** powered by OpenRouter (DeepSeek) to analyze chat messages and shared files, generating contextually relevant study aid responses.

HiveMind | *Next.js, TypeScript, FastAPI, SQLAlchemy/SQLite, LangChain/LangGraph, OpenRouter, WebSockets*

- Built a real-life simulation environment that extracts seed information from real-world inputs such as news, policy drafts, financial signals, reports, and stories to construct high-fidelity parallel digital worlds.
- Designed a **multi-agent system** where thousands of agents with independent personalities, long-term memory, and behavioral logic evolve socially, generate prediction reports, and let users test what-if scenarios in interactive sandboxes.

Awards

SeeCare | **W25 Best Senior Project Award** | *FastAPI, MongoDB, AWS Rekognition/S3, DeepFace, AssemblyAI*

- Created a **privacy-first mobile memory aid** for dementia support that combines **facial recognition**, conversation transcription, and generated memory summaries to help patients identify people and recall prior interactions.
- Implemented real-time face detection with **AWS Rekognition** and **DeepFace embeddings**, using DBSCAN clustering to group unknown faces and improve reliable person identification over time.
- Built a wake-word conversation capture system with Expo Audio, **AssemblyAI speech-to-text**, **speaker diarization**, and OpenAI summarization for searchable caregiver and patient context.

Skills

Languages: Python, TypeScript, JavaScript, Java, C/C++, Rust, SQL
AI/Data: LLM Orchestration, RAG, Embeddings, Semantic Search, Multi-Agent Systems, PyTorch, Scikit-learn, OpenCV
Platforms: React, Electron, FastAPI, Flask, Prisma, PostgreSQL, Supabase, MongoDB, Redis, Docker, AWS, GitHub Actions, Linux, n8n
Soft Skills: Product Sense, Technical Communication, Problem Decomposition, Rapid Prototyping, Ownership, Collaboration
